Office Action Summary

Application No.

09/665,821

Applicant(s)

KIRCHHOFF, KENNETH J.

Examiner

Gwendolyn Baxter

Art Unit

3632

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-10, 12-17 and 19-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 2-10, 12-17 and 19-29 is/are allowed.
- 6) ☒ Claim(s) 30-32 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3632

This is the seventh office action for serial number 09/665,821, Adjustable Keyboard Tray, filed on September 20, 2000. Applicant has filed a requested for continued examination filed March 22, 2004.

Withdrawal of Finality

Upon review of applicant's arguments, the finality of the previous Office action has been withdrawn and the following action has been taken. Any inconvenience is regretted.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,616,798 to Smeenge in view of U.S. Patent No. 5,655,743 to Martin. Smeenge discloses an adjustable keyboard tray comprising a tray (11) having a molded top and bottom plates (not numbered) and a mounting plate (50). The top and bottom plates are made of a polymeric material (col. 5, lines 34+). The mounting plate is secured to the adjustable keyboard tray to the bracketing mechanism (12). The top and bottom plates form a cavity (45) and are made of plastic or synthetic resin. The top surface of the mounting plate is in direct alignment with the top surface of the bottom plate. However, Smeenge fails to teach the bottom plate of the tray being secured to or separable from the top plate.

Art Unit: 3632

Martin teaches a keyboard tray comprising a top plate (21) and medial plate (22) forming a cavity there between. For purpose of this Office action, the medial plate will be referred to as the bottom plate of the keyboard tray. Beneath the bottom plate of the tray is a resilient foam material to rest upon the user's lap. The top and bottom plates are formed of a polymeric material (col. 4, line 4+). A pocket is created along a side of the keyboard tray that is aligned with an opening (33) through the side of the tray to receive and secure a mouse bracket (39), which supports a mouse platform. The mouse bracket is releasably secured in the pocket by a tab (53) and is received in a slot (52) on the mouse bracket. The bottom plate is shown having a plurality of inner walls (43) along the opposed facing surface. See figure 4. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the molded integral tray as taught by Smeenge to have incorporated the stackable molded top and bottom plates as taught by Martin for the purpose supporting a keyboard thereupon as merely functional equivalent parts while simultaneously supporting a mouse thereupon. Furthermore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the top plate to have incorporated a plurality of inner walls as taught by Martin along the opposed facing surface of the top plate for the purpose of reinforcing the top plate and further improving the slidability of the mouse platform, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Regarding claim 30, the limitation “opposed facing surfaces that are ultrasonically welded together” has not been given patentability weight, since this limitation is a product by

Art Unit: 3632

process limitation. The patentability of a claim to a product does not depend on merely a difference in its method of production, but on whether the product itself is new and unobvious.

Allowable Subject Matter

Claims 2-10, 12-17, and 19-29 are allowed

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach a mounting plate that secures the adjustable keyboard tray to the bracketing mechanism such that the mounting plate is secured to a bottom surface of the bottom plate of the keyboard tray in a recessed mounting areas of the keyboard tray.

Response to Arguments

Applicant states the Examiner contends that it would have been obvious to have made a top and bottom plates having a plurality of inner walls along the opposed facing surface, since it has been held that mere duplication of the essential working parts of a device involved only routine skill in the art. In fact, Martin teaches a plurality of ribs (43) along the bottom plate and the it would be an obvious modification to incorporate ribs along the top plate.

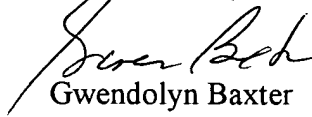

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gwendolyn Baxter whose telephone number is 703-308-0702. The examiner can normally be reached on Monday-Wednesday, 8:00am -5:30pm.

Art Unit: 3632

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leslie A Braun can be reached on 703-308-2156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
